

COMPANY PROFILE

Alexey Maron, sprinkler systems planning – office that provides solutions in consulting, planning of water and fire extinguishing systems, sprinklers and complex systems. In addition, the firm supports construction and upgrading of existing buildings projects.

Our consulting and planning services are suitable for different types of buildings, including industrial buildings, high-tech buildings, warehouse buildings, residential buildings, public buildings and others.

Alexey Maron, founder of the company, has extensive experience in planning and consulting. Many projects have been successfully completed by him in various areas. Experience and execution of many projects allow Alexey Maron and his office team to work creatively and efficiently on the one hand, and keep the required standards and follow instructions on the other hand.

These are some of the projects carried out by the company:

- the Purple Tree – storage: 6000 m²,
- Shaked – storage: 2300 m²,
- Taas – production: 8000 m²,
- the Carasso Tower – offices: 7000 m²,
- Bezeq – server room planning: 4700 m²,
- Noble Energy – storage: 3700 m²,
- Chemothal – storage: 6000 m²,
- Carlsberg – offices and storage,
- Coca-Cola – storage: 4000 m²,
- Paragon – project permits,
- Nur-Esh – project permits,
- Isotop – Production halls 2000 m².

Design experience in Revit – one year.

Design experience in Autocad – 10 years.

The company clients enjoy, amongst other things, our success in submitting more than 90% of the projects to the approval of the relevant authorities at the first attempt. This statistics saves time and money to our clients.

The company espouses effective planning, that is, the use of minimal means to obtain the necessary approvals and compliance with the standards on the one hand, and the protection of a safe environment and proper operation on the other. This approach enables execution costs savings without the need to compromise on what is required.

The aforementioned is done in hope of real and long-term cooperation.

The office principles:

- Maximum availability and availability to the client, telephone and email reply, meetings with consultants.
- Fulfillment of commitments and keeping to the schedule.
- Planning according to the required procedures and regulations as a binding part of the work process.

Each planning process is based on a proven method of obtaining an optimal product while meeting deadline and success of the project.

- In-depth acquaintance with the client (needs, requirements, limitations, etc.).
- Knowledge of the project outline, interfacing with the relevant authorities and understanding the required product.
- Planning a schedule, defining milestones and control points.
- Execution of the planning project while ensuring that the client is updated on each development.
- Completion of planning and quality inspection.
- Approval of the project by relevant authorities.
- Providing service and response even after project completion.

Each project is based on standards relevant to the field of activity: NFPA 13, NFPA 20, Israeli Standard 1596, Planning and Building Law, etc.

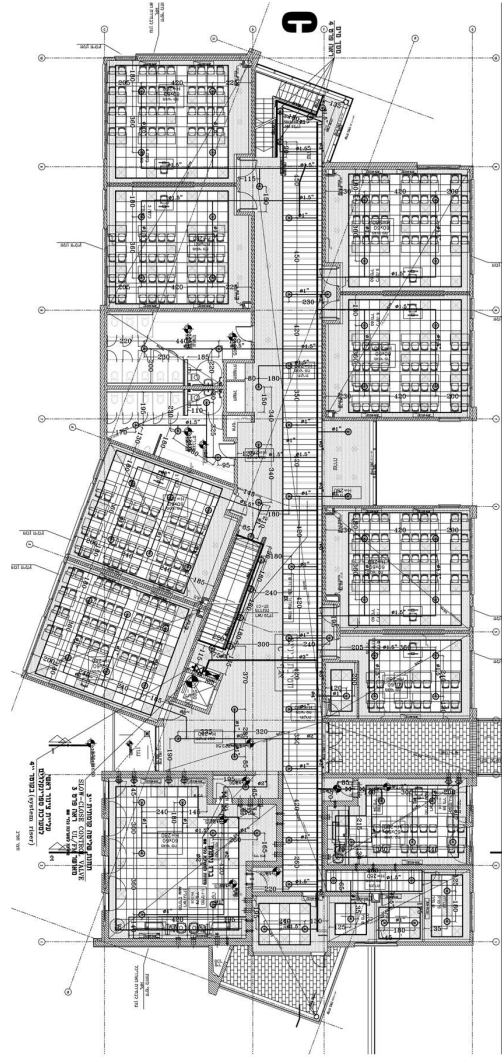

We will be happy to assist you in any matter while maintaining confidentiality and full loyalty.

Sincerely Yours,

Alexey Maron and office team
